

BUSINESS OVERVIEW

We enable renewable energy solutions for local communities.

## COMPANY

# Real project experience that you can trust.

The Dimension team builds upon over 1,000 megawatts of solar and energy storage capacity with direct experience at leading cleantech firms, including SunEdison, First Solar, Tesla, Solar City, SunPower and more.

Founded in 2018, Dimension Renewable Energy is headquartered in Atlanta, with regional offices in New York and San Francisco.

Key investors include founders and board members of leading energy companies across North and South America. Combined experience exceeds 2 GW of renewable energy projects.

## EXPERIENCE

# We take nationwide experience and adapt it to local communities.

## SERVICES

# We push a clean energy transition forward.

### Site Acquisition

Earn revenue by leasing or selling available space for solar and/or energy storage. We make it easy to benefit with little effort.

### Community Solar

Support your community and meet your renewable energy goals while adhering to strict responsible development guidelines.

### Utility Energy Storage

Meet your resiliency and budget goals with wholesale energy storage solutions that are safer and more proven than ever.

We take pride in a partnership model that connects local project communities to the global renewable energy economy.

## TEAM

We take pride in a quick process from inception to completion.

### Rafael Dobrzynski

Chief Executive Officer

Rafael is a seasoned C-level executive with wide-ranging, global experience in starting up, turning around, and developing companies primarily in the renewable energy sector.

Prior to co-founding Dimension, he was the CEO at ForeFront Power, a spin-off of the C&I business unit of SunEdison which he led since 2014 after the merger of Enfinity America, a distributed generation IPP acquired by SunEdison and Terraform, where he also served as CEO beginning in 2009. Prior to this, Rafael was the Head of C&I Development and Head of Trade for Enfinity in Europe, positioning the company in a leadership position in the European market and also worked for almost a decade in the development of Renewable energy and Transmission and Distribution projects globally for Mitsubishi Electric.

Rafael's career has always been focused on the art of taking complex ideas and projects and delivering them as a commercially viable reality.

Rafael holds a BA in Business Administration from the Universidad Externado de Colombia.

### Sam Youneszadeh

Chief Development Officer

Sam is the Co-founder and Chief Development Officer of Dimension Renewable Energy where he leads all origination and development activities.

Prior to co-founding Dimension, he was the Chief Development Officer at ForeFront Power where he led the origination team to over 500MW of projects in 18 months. Prior thereto, Sam spent 8 years at SunEdison in variety of roles, most recently as the Regional GM of the Western US. As an early member of the C&I team, Sam drove the market strategy and origination for the Western US, leading to the origination of over \$2.5B of distributed generation projects, including 300MW of self-generated projects. His unique approach to markets allowed SunEdison to be an early mover in many markets and hold market leading positions in California, Minnesota, and Utah.

Sam holds a BA in Law and Society from the University of California, Santa Barbara and an MBA from The Pennsylvania State University.

We are more than experts on renewable energy policy. We drive it forward.

### **Nacho Ruiz**

Head of M&A and Project Finance

Nacho is the Head of M&A and Project Finance of Dimension Renewable Energy where he leads asset monetizations and strategic partnerships. Prior to joining Dimension, he was Managing Director of Rubicon Capital Advisors where he sold renewable energy projects ranging from community solar to large utility-scale across the US. Prior to 2018, he was Executive Director of Cubico Sustainable Investments where he led the origination and execution of utility scale solar projects in Mexico and the US totaling 1 GW. In 2015, Nacho led the due diligence process in the Americas for the sale of a 1.5 GW wind and solar platform from Santander Bank to PSP and OTPP that led to the creation of Cubico. Prior to 2015, Nacho was a VP of Santander Bank Asset & Capital Structuring, covering equity and tax equity investments in renewable energy totaling 1GW of renewable energy projects across the US.

Nacho holds a double degree in Business and Law at ICADE, Madrid (Spain).

### **Joe Henri**

VP, Business Development

Joe Henri is the Vice President of Business Development, New Markets for Dimension Renewable Energy. Joe works with utilities and regulatory agencies across the United States with a focus on community solar project development and public policy. Previously, Joe worked with ForeFront Power and SunPower in business development roles, and for SunEdison in regulatory policy. Joe's energy experience began with Pacific Gas & Electric in San Francisco where he worked in financial analysis, energy risk management, utility regulatory strategy and power contract negotiation.

Joe attended Stanford University for a B.S. in Earth Resources and the University of California Berkeley for an MBA.

### **Matt McMonagle**

VP, Business Development & Energy Storage

Matt brings a successful and diverse background to Dimension. Prior to joining, Matt was an integral part of the ForeFront Power leadership team, where his accomplishments included: driving energy storage strategy across the US international expansion into Mexico and structuring tax equity for solar and storage assets. He was previously Chief of Staff for the C&I business unit of SunEdison reporting directly to the division CEO. He also served as PowerFactor Sales Manager for Solar Grid Storage, working to commercialize energy storage with solar, as well as stand-alone storage systems.

Matt completed a M.S. in Sustainable Engineering from Villanova University in 2013. He holds a B.S. in Physics from Cornell University where he graduated cum laude.

Dimension is driven to push our economy forward while fostering a socially responsible clean energy transition.

**Robert Hatton**  
VP, Real Estate

Robert has 20 years of real estate and development experience across the U.S. He leads the Dimension real estate team as we originate quality solar and energy storage projects in our chosen markets, and has oversight of our contracting, due diligence, and early stage development activities. Prior to joining Dimension Renewable Energy, Robert was with ForeFront Power, where he led their land acquisition activities in the Midwestern U.S., originating over 150MW of projects across dozens of sites. Before that he was with First Solar, where he managed an 800MW portfolio of contracted projects and readied them for construction, and also secured nearly 30,000 acres of project land and conserved over 8,000 acres of mitigation land associated with his projects. Robert has experience in commercial real estate and residential development and is an active real estate investor.

Robert holds a bachelor's degree in English Literature from The Ohio State University.

**Nick Walsh**  
Director of Development

Nick leads the Project Development team for Dimension Energy. In this role, he oversees both internal project development activities, as well as external consultant relationships and outsourced task assignments for the planning and permitting of solar and energy storage projects in all active markets. While managing the active project portfolio, Nick also coordinates with the Real Estate and Business Development teams to evaluate opportunities in future markets. Prior to taking on this role, Nick led development efforts for 100MW of ground mounted and roof top projects in multiple markets. Before joining Dimension Energy, Nick had the role of Senior Project Development Manager at Tesla/SolarCity where he originated and developed solar and energy storage projects in several market categories including C&I projects in both the public and private sectors, as well as small scale utility.

Nick holds a bachelor's degree in Marketing from Boston College.

Dimension Renewable Energy strives to be more than a market participant by paving the way toward clean energy access for all, nationwide.
